

Michigan Pheasant Restoration Initiative

RESTORING HABITAT TOGETHER

Coalition Midpoint Accomplishments

“I sincerely thank this initiative and all its sponsors for their support, dedication, and commitment to the people and communities of Michigan.”

- Governor Rick Snyder
from his tribute to the MPRI

THE MICHIGAN PHEASANT RESTORATION INITIATIVE

(MPRI) is a conservation initiative to restore and enhance Michigan pheasant habitat, populations and hunting opportunities on private and public lands. It will accomplish this through public-private cooperatives of 10,000 acres or more that will improve habitat for pheasants and other wildlife on a landscape level. The MPRI works by acquiring state and federal resources to assist landowners within the cooperatives in improving wildlife habitat on their property and by improving habitat on selected state game areas, recreation areas, or other public lands.

GOALS OF THE MPRI

1. Impact 200,000 acres by restoring or enhancing 25,000 acres of grassland habitat
2. Increase access to quality pheasant hunting on both public and private lands
3. Increase pheasant hunter recruitment and retention by 25% by 2020
4. Develop habitat management guidelines and training
5. Develop partnerships to restore wild pheasant populations in suitable habitats in Michigan
6. Monitor populations and conduct research to ensure the best management of the pheasant resource
7. Provide sustainable funding and resources necessary to implement the initiative

“ I love the opportunity to work with many wildlife habitat programs on both public and private land. What I enjoy most is building a rapport with my landowners; helping them reach their property goals; and assisting in making a difference in the habitat on their land. ”

- Monique Ferris,
Farm Bill Biologist

STAFF

COOPERATIVES COORDINATOR

Michigan United Conservation Clubs (MUCC), Quality Deer Management Association (QDMA), Pheasants Forever (PF) and the Michigan Department of Natural Resources (DNR) have funded a Cooperatives Coordinator to increase wildlife cooperatives in the state. Housed in the MUCC office building, Anna Mitterling is the cooperatives coordinator for southern Michigan.

“Pheasant cooperatives are a great way for neighbors to build relationships with each other while working toward a common goal of improving habitat on their properties. I am honored and thrilled to be part of enhancing and developing these cooperatives around southern Michigan.”

- Anna Mitterling,
Wildlife Co-operative Coordinator

MORE BOOTS ON THE GROUND FOR MPRI

With the DNR's 2014 license restructuring, each hunter must now purchase a base license, which includes a small game license (and a contribution to conservation in the state of Michigan). With this funding, the DNR has committed to improving pheasant habitat, pheasant hunting and pheasant hunter recruitment. In addition, this license change has allowed the DNR to hire new wildlife biologists, technicians and assistants that help with habitat management activities for pheasants and other wildlife species. Eight Farm Bill Biologists/ Soil Technicians have also been added to provide technical assistance and help landowners enroll in various state and federal programs.

HABITAT

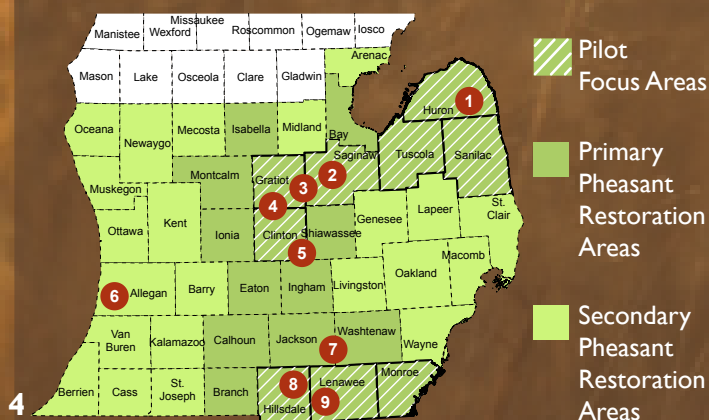

ACRES IMPROVED ON STATE GAME AND RECREATION AREAS

	Grassland Acres Enhanced or Restored	Acres of Food Plots Planted
1	Verona SGA (and small SGAs in Thumb region)	
	5,715	2,500
2	Shiawassee River SGA	
	742	375
3	Gratiot Saginaw SGA	
	67	80
4	Maple River SGA	
	370	175
5	Rose Lake SWA	
	110	30
6	Allegan SGA Fennville Farm Unit	
	765	2,000
7	Sharonville SGA (and surrounding small SGAs)	
	556	203
8	Adams Township SGA	
	57	0
9	Lake Hudson SRA	
	378	0

FEDERAL FARM BILL PROGRAMS

A number of federal programs are available to assist landowners with conservation on their lands through the US Department of Agriculture (USDA). USDA provides technical and financial assistance to landowners that protect environmentally sensitive agricultural land by implementing conservation practices that improve environmental health, quality and restore wildlife habitat. Programs include the Conservation Reserve Program (CRP), the Conservation Reserve Enhancement Program (CREP), the State Acres For wildlife Enhancement (SAFE), and the Agricultural Conservation Easement Program-Wetland Reserve Easement (ACEP-WRE).

Federal Farm Bill Program	Acres Enrolled
CRP	178,000
CREP	77,000
SAFE	9,000
ACEP-WRE	23,554

“The DNR is committed to managing habitat on both private and public lands with emphasis on the MPRI core areas. Restoring and enhancing nesting and winter cover for pheasants will help us increase both pheasant populations and pheasant hunting opportunities in Michigan.”

-Mike Parker,
DNR Conservation Partners Program Specialist

HABITAT IMPROVEMENTS

Ducks Unlimited – 58 projects including 1,456 acres of grassland habitat management

National Wild Turkey Federation – 317 acres of grassland established

Pheasants Forever – 75,161 acres of habitat = 59,247 acres food plots; 8,553 acres grassland planted; 6,709 acres grassland enhanced; 482 acres wetland restored; 170 acres woody cover planted

US Fish and Wildlife Service – 1,910 acres grassland; 559 acres wetland

WILDLIFE HABITAT GRANT PROJECTS

The 2014 license restructuring has provided the DNR an opportunity to offer Wildlife Habitat Grants. These grants are available to local, state, federal and tribal units of government, profit or non-profit groups, and individuals to assist the Wildlife Division with developing or improving wildlife habitat for game species. Several MPRI Coalition projects have been funded with Wildlife Habitat Grants in Gratiot, Sanilac, Lenawee, Hillsdale, Washtenaw, Jackson, Clinton, Saginaw, Huron, Lapeer, Ingham, Livingston and Isabella counties.

TOTAL -

\$1,152,710 awarded and

3,265 acres improved

Maple River State Game Area Wildlife Habitat Improvement Project

Completed by the Gratiot Conservation District

Funding for this project was provided by the 2014 Michigan Department of Natural Resources Wildlife Habitat Grant Program, which is generated from hunting and trapping license revenues.

Thank you to Michigan's hunters and trappers, and the partners below who all made this project a success.

BENEFITS FOR OTHER SPECIES

Improving grasslands benefits more than just pheasants. White-tailed deer, wild turkeys, bobwhite quail, Monarch butterflies, and numerous grassland songbirds can find food, nesting habitat and bedding cover in MPRI grasslands.

“One of the biggest threats to our native grassland birds is the loss of habitat – especially large, diverse, high quality grasslands. For species like the Henslow’s sparrow and northern harrier, restoration of landscapes with a significant grassland component is vital. The MPRI helps to meet these needs and protect our natural heritage.”

- Karen Cleveland,
DNR All-Bird Specialist

PHEASANT CO-OPERATIVES

- 1 Unionville Pheasant Co-Op

- 2 Sandusky Pheasant Co-Op

- 3 Crosswell Pheasant Co-Op

- 4 Mayville Co-Op

- 5 Millington Co-Op

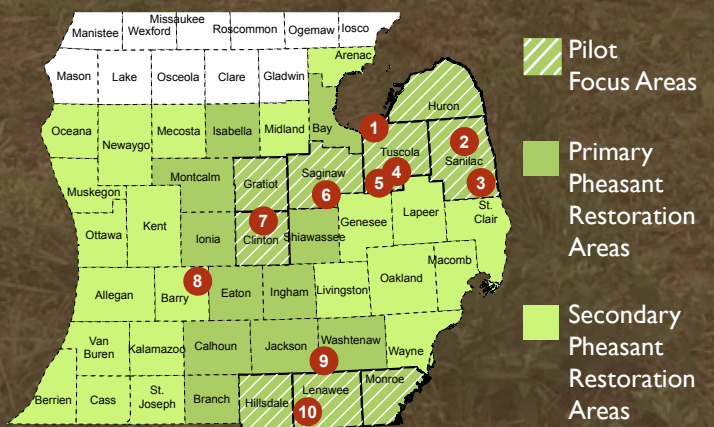

- 6 Layton Corners Co-Op

- 7 Clinton Lakes Pheasant Co-Op

- 8 Baltimore Township Co-Op

- 9 Sharonville State Game Area Co-Op

- 10 Lake Hudson Pheasant Co-Op

“The MPRI has created the kind of excitement around farmland conservation that really makes a difference. We have completed more good work in the past five years than the last 15. I am happy to see the changes in the landscape.”

-Steve Shine
MDARD Environmental Stewardship Division Conservation Programs Manager

REGIONAL CONSERVATION PARTNERSHIP PROGRAM (RCPP)

This program uses partnerships to stretch and multiply conservation investments and reach conservation goals on a regional or watershed scale. Partners participating in RCPP can use their local knowledge and networks to undertake conservation projects by joining with agricultural producers to restore or sustain natural resources such as clean and abundant water, healthy productive soils, enhanced wildlife and pollinator habitat.

HABITAT INCENTIVE PROGRAM (HIP)

The DNR Wildlife Division, in partnership with the Michigan Department of Agriculture and Rural Development (MDARD), is providing technical assistance and financial incentives to encourage landowner participation in the Continuous Conservation Reserve Program (CCRP). Participating landowners receive a Habitat Incentive Payment (HIP) of \$150/acre by agreeing to plant native species and increase the minimum width of corridor conservation practices to maximize wildlife habitat values. HIP's goal is to enroll 5,300 acres of CCRP in the Upper & Headwaters of St. Joseph River watershed.

Southcentral Lower Peninsula

HUNTER ACCESS

STATE GAME AREA LAND ACQUISITIONS

1	2	Maple River State Game Area Two parcels totaling 43 acres	
3	4	Shiawassee River State Game Area Two parcels totaling 105 acres	
5		Minden City State Game Area 40 acres	
6		Petersburg State Game Area 58 acres	
7	8	9	Erie State Game Area Three parcels totaling 125 acres
10		Dansville State Game Area 90 acres	
11		Allegan State Game Area 15 acres	
12		Cornish State Game Area 275 acres	
13		Unadilla State Wildlife Area 136 acres	
14	15	Port Huron State Game Area Two parcels totaling 30 acres	

917 total
acres purchased!

RECRUITMENT & RETENTION

- DNR and PF signed a three-year cooperative agreement to cost share a position that would be responsible for assisting in the implementation of the hunter recruitment objectives contained in the MPRI.
- Organized and successfully held the Great Outdoors Youth Jamboree at Lake Hudson State Recreation Area to highlight the MPRI and hunting opportunities associated with the effort. The event was held in 2013, 2014 and 2015 with over 900 visitors each year.
- DNR, PF, National Wild Turkey Federation and the National Shooting Sports Foundation partnered to host Mentored Youth Hunt Demo days at DNR shooting ranges for the last three years.
- In 2013, two of the three pilot priority areas hosted youth pheasant hunts. One in the southeast and three in the Thumb priority area. In 2014, 16 youth pheasant hunts were held reaching more than 200 youth.

HUNTER ACCESS PROGRAM ENROLLMENT

Michigan's Hunting Access Program (HAP) provides public hunting opportunities in southern Michigan where 97 percent of the land base is privately owned. Providing access to quality hunting lands close to urban properties is a key component to offering additional hunting opportunities, as well as attracting new and retaining current hunters. The Wildlife Division has utilized funding from two USDA Voluntary Public Access – Habitat Incentive Program (VPA-HIP) grants to more than triple HAP enrollment since the MPRI began. HAP hunters took an estimated 46,419 trips to HAP farms during the 2013 hunting seasons.

VPA-HIP Grant Funds:

2011	\$935,000,
2014	\$1.2 million
Total	\$2,164,299

2015 HAP Enrollment: 170 properties,
20,089 acres

EDUCATION & OUTREACH

LANDOWNER EDUCATION TOOLS

MPRI partners have developed tools to help landowners learn about the MPRI how to manage their lands for pheasants. These tools include:

- Informational brochure & flyer,
- Landowners' guide,
- Informational video,
- Website (mi.gov/pheasant),
- Door hangers,
- Petition for cooperative leaders,
- Over a dozen press releases promoting the initiative and pheasant hunting in Michigan,
- Over two dozen workshops, public meetings and forums.

FUNDING

“Critical wildlife habitat improvements are occurring right now through programs such as the MPRI, On-the-Ground, and Wildlife Habitat Grants. The development or improvement of these programs are the direct result of the 2014 license increase. Thanks to hunter enthusiasm and willingness to purchase licenses, the Wildlife Division is on track to deliver the habitat improvements promised when this license restructuring passed.”

- Russ Mason,
DNR Wildlife Division, Chief

NORTH AMERICAN WETLANDS CONSERVATION ACT GRANTS (NAWACA)

NAWACA is a federal grant administered by Ducks Unlimited that provides money for wetland and grassland habitat improvement in Southern Michigan. More than \$3 million has been provided for habitat acquisition and management.

WILDLIFE HABITAT GRANT PROJECTS

The 2014 license restructuring has also allowed the DNR to offer Wildlife Habitat Grants. These grants are available to local, state, federal and tribal units of government, profit or non-profit groups, and individuals to assist the Wildlife Division with developing or improving wildlife habitat for game species. Several MPRI partner projects have been funded with Wildlife Habitat Grants.

**TOTAL - \$1,152,710 awarded and
3,265 acres improved**

STATE WILDLIE GRANTS (SWG)

Michigan's Wildlife Action Plan identified grasslands, prairies and savannas as conservation priorities due to their rarity, wildlife value and their dependence on private land management. Pheasants and other grassland birds require large blocks of grassland habitat for nesting, brood-rearing and winter thermal cover. In 2012, the DNR Wildlife Division was awarded a federal Competitive State Wildlife Grant totaling \$864,689 to restore and enhance diverse grassland complexes to benefit grassland species of greatest conservation need.

**Public Land: 1,093 acres, 12 projects
Private Land: 1,773 acres, 37 projects**

MONITORING

SURVEY TYPES USED TO MONITOR PHEASANTS

- Mail Carrier Surveys
- Crowing Counts
- Breeding Bird Survey
- Pheasant Hunter Surveys
- Pheasant Cooperator Surveys
- HAP Hunter Surveys

“Since the co-op (Mayville) started the crowing surveys, we’ve seen a steady increase in crowing rooster pheasants. We plan on continuing the surveys every spring to see if our hard work of increasing grasslands on the land is paying off.

- Doug Graham,
Mayville Cooperative Landowner

“Three of us went to the Thumb yesterday and hunted pheasants. We hunted for about four hours in three different state land locations. We flushed 10 roosters and 9 hens, which was probably the best numbers I’ve seen in 15 years of hunting there. Thanks for the hard work improving the habitat!”

- Jim Fisher
Pheasant Hunter

“We congratulate the MPRI Coalition, landowners, hunters, and other conservationists for all your efforts during the first 5 years of the MPRI. You are all making a difference. The numbers in this report are very impressive, and many of these efforts will mature over the next several years. There continues to be challenges with land use and declining landowner participation in federal habitat programs. The Coalition is committed to an even more productive next 5 years to meet these challenges head-on. We hope you will join us in this important venture. ”

- Bill Vander Zouwen,
Pheasants Forever Region Representative and MPRI Co-chair

- Al Stewart,
DNR, Upland Game Bird Specialist and MPRI Co-chair
