

## Help keep Pretty Boy's "business" out of the creeks that feed the Cass River

Pretty Boy's contributions may not seem like much. But multiply the Pretty Boys in the region, and that's a significant load of *E. coli* bacteria, from manure running off into the creeks that flow into the Cass River. As a result, people swim in unhealthy polluted water downstream, risking their health.

### We'll pony up to help

The government is offering a 75/25 match to landowners to help solve the problem. For instance, we'll buy a fence if you'll install it. Or we'll buy a watering system or build manure storage that will cost you only 25 cents on the dollar.

### We're not horsing around!

This grant is available for a limited time. Please call Mike Boike from the Tuscola Conservation District to discuss options: [mike.boike@mi.nacdnet.net](mailto:mike.boike@mi.nacdnet.net) or **989-673-8174 ext. 102**. Together, we'll work to improve your land and our shared watershed.

Cost-share is wholly funded through the Michigan Department of Environmental Quality's Nonpoint Source Program by the United States Environmental Protection Agency. Programs and services are offered on a nondiscriminatory basis without regard to race, color, national origin, gender, religion, age, or disability.
